**Adhesive, Grout & Sealant Products for Ceramic and Stone Materials**

### Adhesives - Normal Settings

**Adhesives P9**
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.
- Ideal for fixing ceramic tiles on walls and floors.
- Can be used on gypsum boards and artificial stone materials.

**Adhesives P10**
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.
- Can be used on gypsum boards and artificial stone materials.
- Ideal for fixing ceramic tiles on walls and floors.

**Isolastic**
- Slit-resistant and extended open time for ceramic tiles and stone materials.
- Ideal for fixing ceramic tiles on walls and floors.
- Can be used on gypsum boards and artificial stone materials.

**Keraset**
- Slit-resistant for ceramic tiles and stone materials.
- Ideal for fixing ceramic tiles on walls and floors.
- Can be used on gypsum boards and artificial stone materials.

**Ultralite S1**
- Slit-resistant and extended open time for ceramic tiles and stone materials.
- Ideal for fixing ceramic tiles on walls and floors.
- Can be used on gypsum boards and artificial stone materials.

### Adhesives - Fast Setting

**Adhesives P4**
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.
- Can be used on gypsum boards and artificial stone materials.

**Elastoral**
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

**Granirapid**
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

**Kerapoxy Design**
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

### Adhesives - Reactive

**Keratalastic**
- High performance, polymer modified cement based anaerobic adhesive for ceramic tiles and stone materials.
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

**Keraflex Maxi S1**
- High performance, polymer modified cement based anaerobic adhesive for ceramic tiles and stone materials.
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

**Keraflex**
- High performance, polymer modified cement based anaerobic adhesive for ceramic tiles and stone materials.
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

### GROUTS - Cementitious

**Ultraceutop Plus**
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

**Keracolor FF**
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

**Keraflex**
- High performance, polymer modified cement based anaerobic adhesive for ceramic tiles and stone materials.
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

**Keraflex Maxi S1**
- High performance, polymer modified cement based anaerobic adhesive for ceramic tiles and stone materials.
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

**Keraflex**
- High performance, polymer modified cement based anaerobic adhesive for ceramic tiles and stone materials.
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

### GROUTS - Epoxy

**Eracleal Plus**
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

**Keraflex**
- High performance, polymer modified cement based anaerobic adhesive for ceramic tiles and stone materials.
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

**Kerapor T**
- High performance, polymer modified cement based anaerobic adhesive for ceramic tiles and stone materials.
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

### ELASTIC SEALANTS

**Mapesil AC**
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

**Mapesil LM**
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

### READY TO USE PRODUCT IN PASTE FORM

**Fix & Grout Brick**
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

**Flexcolor**
- Suitable for interior and exterior bonding of ceramic, stone, glass and other materials.
- Slit-resistant with no vertical slip.

### CLASSIFICATION OF ADHESIVES IN COMPLIANCE WITH EN 13007-1 & 3

### CERTIFIED QUALITY

For further information, refer to the latest version of the related product datasheet which is available on our website www.mapei.ae or contact your Mapei representative.
**Systems & Solutions for Commercial Centers**

**Rapid Installation of Natural Stone Slabs**

- Reinforced cement floor slab
- Screed
- Topcem Pronto Screed
- Nivorapid Smoothing compound
- Marble slab
- Gypsum board
- Insulating panel
- Polyethylene sheet
- Stone adhesive
- Elastorapid

**In Compliance With International Standards**

- Cementitious Grout
  - ISO 13007-3
- Reaction Resin Grout
  - ISO 13007-3

**Systems & Solutions for Tile on Tile**

- Existing ceramic flooring
- Adhesive
- Adesilex G19
- Soundproofing membrane
- Mapesonic CR
- Porcelain tiles

**In Compliance With International Standards**

- Cementitious Grout
  - ISO 13007-3

**Systems & Solutions for Swimming Pools and Wet Areas**

- Reinforced cement structure
- Waterproofing (2 coats)
- Mapelastic Smart
- Polypropylene fabric
- Mapetex Sel
- Glass mosaic

**In Compliance With International Standards**

- Cementitious Adhesive for Ceramic Tiles
  - ISO 13007-1
- Reaction Resin Grout
- Kerapoxy CQ

**Systems & Solutions for Bathrooms and Wet Areas**

- Concrete substrate
- Screed
- Topcem Pronto Screed
- Waterproofing (2 coats)
- Mapelastic Aquadefense
- Polypropylene fabric
- Mapetex Sel
- Ceramic tiles

**In Compliance With International Standards**

- Cementitious Adhesive for Ceramic Tiles
  - ISO 13007-1
- C2FTE S2

**Adhesive, Grout & Sealant Products**

- Adhesive, Grout & Sealant Products for Ceramic and Stone Materials

**I.B.S (Innovative Building Solutions) L.L.C**

- P.O Box: 73869, Dubai - United Arab Emirates
