Idrocrete S is a water-repellent, liquid admixture with the capacity to considerably reduce water absorption of hardened concrete and prevent the formation of surface efflorescence.

WHERE TO USE
Idrocrete S is particularly suitable for all those applications where waterproofing properties need to be improved.

Idrocrete S is used to make concrete with low water absorption and to prevent the formation of surface efflorescence.

Idrocrete S is particularly recommended as a mass waterproofing product in the production of concrete structures.

Some application examples
- Foundation concrete.
- Concrete for retaining walls.
- Concrete for structures below ground level (cellars, pits, lift shafts).
- Concrete for depuration tanks, storage tanks, channels, etc.
- Vibration-compressed concrete.
- Ready-mixed concrete.

TECHNICAL CHARACTERISTICS
Idrocrete S is an admixture made from water-repellent components in water emulsion according to a formula developed in the MAPEI Research & Development laboratories.

When Idrocrete S is used at a rate of 0.6-1.2% of the weight of the cement, it does not modify the performance characteristics of fresh concrete or the development of its mechanical strength.

We recommend using Idrocrete S in combination with a superplasticizer from the Chronos, Dynamon or Mapefluid ranges to make fluid and super-fluid waterproof concrete and to improve the mechanical performance characteristics of hardened conglomerate.

HOW TO USE
Add Idrocrete S in the mixing unit after all the other ingredients (water, cement and aggregates) and mix to form an even blend.

CONSUMPTION
Dosage in volume:
from 0.6 to 1.2 kg per 100 kg of cement. Different dosages from those suggested must be previously tested through concrete trials, in addition to consulting MAPEI Technical Services Department.

PACKAGING
Idrocrete S is supplied in 10 and 25 kg cans.

STORAGE

Store Idrocrete S for 12 months from frost and exposure to direct sunlight.

SAFETY INSTRUCTIONS FOR PREPARATION AND APPLICATION

Idrocrete S is not considered hazardous according to current norms and guidelines regarding the classification of mixtures. However, we recommend using protective gloves and goggles, and to take the usual precautions for handling chemical products. For further and complete information about the safe use of our product please refer to the latest version of our Material Safety Data Sheet.

PRODUCT FOR PROFESSIONAL USE.

WARNING

Although the technical details and recommendations contained in this product data sheet correspond to the best of our knowledge and experience, all the above information must, in every case, be taken as merely indicative and subject to confirmation after long-term practical application; for this reason, anyone who intends to use the product must ensure beforehand that it is suitable for the envisaged application. In every case, the user alone is fully responsible for any consequences deriving from the use of the product.

Please refer to the current version of the Technical Data Sheet, available from our website www.mapei.com
