

Environmental Policy of Mapei UK Ltd

The company will maximise opportunities that protect the environment from activities which may be created by the company.

This will be assured by the professional management of Environmental aspects of the business and the commitment by all of the management team to the continuous reduction of Environmental impacts and increased awareness of Environmental issues through Commitment to:

- Minimise waste by evaluating operations and activities and ensuring they are efficient as possible. Reduce the usage of consumables in the company.
- Actively promote recycling and re-use of materials both internally and amongst customers and suppliers. When not possible due care will be exercised in respect of waste disposal in accordance with current guidelines and legislation.
- Continually improve environmental performance through evaluation and implementation of procedures and processes required to reduce the impact of its activities on the environment.
- Set environmental targets including the reduction of environmental impacts that will be checked by regular management and supervisory actions together with independent internal and third party audits.
- Minimize carbon emissions through the selection of transport / company vehicles and its required power source.
- Reduce the use of natural resources and increase the use of recycled materials where practical in support to the R & D efforts of Mapei Italy.
- Implementation of training for all staff to raise awareness of environmental issues and enlist their support in improving the company's performance. Ensure due emphasis is placed on the protection of the environment and workplace care / safety /cleanliness.
- Continuously promote the range of products that have been certified to have low environmental impact. Bring to market newly developed low emission, low impact products with maximum efficiency in order to introduce new technologies designed for environmental improvement.
- Meet or exceed all of the current environmental legislation that relates to the company and to be proactive in the swift implementation of new requirements.
- Support the principles of **Responsible Care®** in respect to eco-sustainability and respect the requirements of Social Accountability.
