DESCRIPTION
MAPEI’s Polymer Additive is an acrylic latex admixture used to enhance the performance of dry-set mortars as well as Mosaic & Glass Tile Mortar. This highly recommended admixture enhances bond strength, flexural strength and freeze/thaw durability.

FEATURES AND BENEFITS (when used instead of water to mix with mortar)
• For mixing with MAPEI’s Floor Tile Mortar, Mosaic & Glass Tile Mortar, Uncoupling Membrane Mortar or Large-Format Floor Tile Mortar
• Improves bond strength of mortar
• Enhances mortar performance and allows use with a wider range of tile and stone over additional substrates
• Good for most difficult-to-bond tiles and interior/exterior surfaces
• When a dry-set mortar is mixed with Polymer Additive rather than with water, the mixture is ideal for setting tile in areas subject to severe climate swings (ranging from high to below-freezing temperatures, and from dry to wet conditions).

SUITABLE TILE OR STONE
• See the Technical Data Sheet (TDS) of the mortar being used for a complete listing of suitable tile and stone and recommended tile size.

SUITABLE SUBSTRATES
• Concrete (cured at least 28 days)
• Masonry cement block, brick, cement mortar beds, render coats and leveling coats
• Cement backer units (CBUs) – See manufacturer’s installation guidelines (interior only)
• APA Group 1 and CANPLY 0121 exterior-grade plywood (interior, residential and light-commercial floors and countertops in dry conditions only)
• See the TDS of the mortar being used for a complete listing of suitable substrates.

WHERE TO USE
• Mix with Floor Tile Mortar to install tile on cement board and plywood.
• Mix with Mosaic & Glass Tile Mortar to install submerged tile.
• Mix with Uncoupling Membrane Mortar to install porcelain tile.
• Mix with Large-Format Floor Tile Mortar to install on MAPEI waterproofing, crack-isolation, sound-reduction and uncoupling membranes.
• See the TDS of the mortar being used for details about where to use.

LIMITATIONS
• Install only at temperatures between 40°F and 95°F (4°C and 35°C).
• Do not use for moisture-sensitive stone (green marble; some limestone and granite), agglomerate tiles or resin-backed tiles. Instead, use suitable epoxy or urethane adhesives (see respective TDSs for details).
• For light-colored and translucent natural stone, a white mortar is recommended.
• Do not use over dimensionally unstable substrates such as hardwood flooring, oriented strand board (OSB), substrates containing asbestos, or metal.
• To use directly over gypsum-based patching or leveling substrates, apply a suitable sealer/primer before use. See the technical bulletin “Tiling over gypsum” in the Related Documents section of the Tile & Stone Installation Systems page on MAPEI’s Website.
• Do not dilute with any other liquids.
• Do not freeze.
• See the TDS of the mortar being used for additional information.

SURFACE PREPARATION
• All substrates should be structurally sound, stable, dry, clean, and free of any substance or condition that may reduce or prevent proper adhesion.
• See the “Surface preparation requirements” reference guide in the Related Documents section of the Tile & Stone Installation Systems page on MAPEI’s Website.

MIXING
Before product use, take appropriate safety precautions. Refer to the Safety Data Sheet for details.
1. Always use a clean mixing container.
2. Shake the Polymer Additive container well before use.
3. See the respective TDS for the mortar being used for detailed mixing instructions.

PRODUCT APPLICATION
See the respective mortar’s TDS for detailed instructions.

EXPANSION AND CONTROL JOINTS
• Provide for expansion and control joints as specified per TCNA Method EJ171 or TTMAC Specification Guide 09 30 00, Detail 301MJ. Do not cover expansion joints with mortar.

PROTECTION
• Protect from traffic for 24 to 48 hours, so that the mortar is sufficiently set.
• Protect the installation from rain for 72 hours, and from freezing for 21 days.
• See the TDS of the mortar being used for additional information.

CLEANUP
• Clean tools and tile while the mortar is fresh using only water.
