

Updates on MAPEI's Self-Leveling Underlayments

September 15, 2022 / 1 p.m. EDT

At MAPEI, we constantly challenge ourselves to learn more about what our products can do so that we can provide you the best information on how to use them for a successful flooring installation. This is especially true regarding our portfolio of self-leveling underlayment (SLU) products.

Based on years of successful installations, input from MAPEI's Technical Services Department and support from R&D, we are making some welcome improvements to the usage, limitations and general information regarding our SLUs.

This presentation will discuss the changes that have been made on all our cement-based SLUs and how those changes will affect your use of them. During this presentation, you will learn how this research has allowed us to make changes regarding the following topics:

- Moisture limits
- Installations over wood substrates
- Surface-profile requirements
- Additional suitable substrates
- Sustainability information and industry standards
- Addition of new performance data

WEBINAR

Updates on MAPEI's Self-Leveling Underlayments

September 15 at 1 p.m. EDT

Duration: 60 min.*

* The Webinar will include a question-and-answer period.
